MICHAEL OJEKUNLE

Frontend Engineer | React • Next.js • TypeScript
Lagos, Nigeria | (234) 904-515-6850 | michojekunle1@gmail.com | michael-ojekunle | @michojekunle

SUMMARY

Frontend Engineer with 4+ years of experience building web applications with React, Next.js, TypeScript, and TailwindCSS. Experienced in translating product requirements into reusable interfaces, integrating APIs and authentication systems, and improving frontend performance and usability. Built and shipped products across web, fintech, and blockchain, including account onboarding, transaction flows, responsive PWAs, and backend integrations.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript, TailwindCSS, SCSS/Sass, Responsive Design, Accessibility
- **Architecture & State:** Component-driven UI, Design Systems, Microfrontends, Monorepos, React Server Components, TanStack Query, Redux, Context API
- **APIs & Auth:** REST APIs, GraphQL, NextAuth.js, Keycloak, OAuth, JWT, API Integration
- **Performance & Quality:** Lighthouse, PageSpeed, Code Splitting, Image Optimization, Caching, Jest, React Testing Library
- **Backend & Tools**: Node.js, PostgreSQL, Supabase, Sanity CMS, Git/GitHub, CI/CD, Docker, Vercel
- **Web3:** Account Abstraction, Wallet/Transaction Flows, Smart Contract Integration, Contract Events, Gas Sponsorship

EXPERIENCE

CoinSafe — Founding/Core Team | Frontend & Blockchain Developer

~18 months

- Built and shipped **40+** dashboard screens across a **4–6** person core team, owning major frontend interfaces and transaction-related product flows.
- Led the frontend implementation of Account Abstraction, supporting Google, email, passkeys, and multiple social-login providers; the onboarding flow helped onboard **100+** users.
- Implemented gas sponsorship so users could complete transactions without needing to hold native gas tokens.
- Designed and implemented a reactive, optimistic event-driven architecture that listened to and parsed **10+** smart-contract event/transaction types, updating local and global application state immediately without requiring page refreshes.
- Integrated **1–3** backend services/APIs with contract interactions to supply data required for blockchain transactions and keep application state synchronized.
- Built the PWA experience across mobile, tablet, and desktop, improving accessibility and usability for users across device formats.

Edifition — Frontend Engineer

Nov 2023 – Jul 2024

- Built **20+** pages and **7+** features as part of a 3-developer team using Next.js App Router, TypeScript, and TailwindCSS.
- Developed **30+** reusable components and UI patterns for recurring product interfaces, reducing duplication across the application.
- Improved the homepage Lighthouse score from **67 to 90** through code splitting, image optimization, caching, and frontend performance work.
- Built a multilingual resources page supporting PDFs, audio, and video content across **10+** locales, alongside static and dynamic scheduling pages.
- Integrated **5–10** third-party APIs/services and implemented authentication with NextAuth.js and Keycloak, including OAuth, session management, login/logout, and protected routes.

Freelance — Frontend / Full-Stack Developer

RHNG | ~3 months

- Designed and built RHNG's company website end-to-end from PRD to production, independently delivering the frontend, backend/API layer, CMS, database, integrations, and deployment.
- Built pages covering engineering, consultancy, CNG/LNG/LPG supply and logistics, training, company information, and contact using Next.js, React, TypeScript, TailwindCSS, and Sanity CMS.
- Built Next.js/Node.js APIs handling form collection, validation, automated workflows, and persistence in PostgreSQL/Supabase, with Resend for email delivery and Google reCAPTCHA for bot protection.
- Implemented Google Analytics, Google Tag Manager, Search Console, Microsoft Clarity, and Vercel Analytics; achieved **100/100** Lighthouse SEO and PageSpeed scores, with **~2.5K** search impressions and 85+ clicks.

Cryptware Systems — Frontend Developer Intern

Aug 2022 – Oct 2022

- Converted UI/UX designs into responsive React interfaces across **1–3 pages**, including interactive components and mobile-responsive layouts.
- Debugged frontend issues and collaborated with senior developers through Agile sprints, standups, and iterative feature delivery.

EDUCATION

University of Lagos — B.Sc. Education, Biology
